Keiretsu Forum Members Lead Cogent Wireless' Seed Round

Cogent's Breakthrough Technology Eliminates Dropped Calls

SAN FRANCISCO, CA--(Marketwire - April 1, 2008) - Keiretsu Forum, the world's largest angel investment community, announces its members' investment in Cogent Wireless Solutions, the Milpitas, California-based company that has developed breakthrough technology to enhance the mobile users' coverage on cellular networks.

After presenting to all four Bay Area Keiretsu Forum chapters in October, Cogent Wireless Solutions closed its seed round and raised \$510,000 of debt financing. Keiretsu Forum members from three Northern California chapters in the East Bay, Silicon Valley, and San Francisco staked the majority of the equity round. This funding will enable Cogent Wireless to provide products and to master sales agents and carriers in the U.S. and Europe.

"Overall, my experience with Keiretsu Forum has been incredibly positive. Several Keiretsu members helped shape our initial go to market plans as well as a complete review and feedback of our budget," said Michael Cumiskey, CEO and Co-Founder of Cogent Wireless Solutions. "In addition to financial capital, the Keiretsu Forum members will help with introductions to high-level connections at key accounts once we have product available, which is truly invaluable."

Keiretsu Forum offers a structured approach to private equity investing by providing a forum for like-minded business leaders to work together and assess investment opportunities and then make individual investment decisions. In this instance, Keiretsu Forum members from three Bay Area chapters invested in Cogent Wireless Solutions.

"Keiretsu members found this to be an outstanding investment opportunity with an excellent founding team," said Keiretsu Forum member and due diligence leader Mohammad Aboobaker. "The Cogent team is very responsive and proactive to investors' concerns and suggestions. The company is poised to a great start with help of Keiretsu members' experience and resources."
